

P100 Access Point backup and restore

Summary

This service is used for 2 different actions:

1. **Generate backup:**

- a. Gets a file backup for jalapeno P100 router.
- b. This script does not receive arguments but can be called via optional environment vars:

```
ROUTERIP="192.168.1.123" ./generate_bkp.sh/etc/init.d/routerconfig
```

- c. Source: https://git.immfly.com/infra/p100/-/blob/master/wifi_router/generate_bkp.sh

2. **Restore backup:**

- a. Restores a backup to jalapeno P100 router from tar.gz file.
- b. This script admits one optional argument and many options via vars

```
ROUTERIP="192.168.1.123" ./restore_bkp.sh "backup_config-OpenWrt-2019-09-02_1821_32.tar.gz"
```

- c. Source: https://git.immfly.com/infra/p100/-/blob/master/wifi_router/restore_bkp.sh
